Con Edison Summer Internship Recent Opportunities 2025

Description

The Con Edison Summer Internship Program offers a unique opportunity for talented students to gain practical experience in the energy and utility industry. The internship program is designed to provide students with exposure to various operational and business functions within Con Edison, one of the largest utility companies in the U.S. Interns will have the chance to contribute to key projects, learn from industry professionals, and develop valuable skills in a fast-paced and innovative work environment. This internship program aims to foster the next generation of leaders in the energy sector.

Responsibilities

Interns will be assigned to specific departments and will be involved in various projects related to Con Edison's operations, technology, customer service, sustainability, and more. Responsibilities may include:

- Conducting research and data analysis to support ongoing projects and initiatives.
- Assisting in the development and execution of business strategies and operational improvements.
- Participating in the design, planning, and optimization of energy solutions and infrastructure.
- Supporting teams with project management tasks, including tracking timelines, deliverables, and resource allocation.
- Engaging in hands-on work related to field operations, engineering, and technology development.
- Collaborating with cross-functional teams to drive efficiency and innovation across various departments.
- Preparing presentations, reports, and documentation summarizing findings and recommendations.
- Attending team meetings, training sessions, and networking events to broaden industry knowledge and skills.
- Performing other duties as assigned based on department needs.

Qualifications

- Must be currently enrolled in an undergraduate or graduate program.
- Applicants should be pursuing a degree in fields such as Engineering (Electrical, Mechanical, Civil), Environmental Science, Business Administration, Finance, Information Technology, Sustainability, or other related disciplines.
- Applicants must have a minimum GPA of 3.0 or higher.
- U.S. Citizenship or permanent residency is required.
- Ability to work full-time during the summer internship period.

Experience

- Previous internship or project experience in energy, utilities, engineering,
