FWHA Internship Recent Graduate & Program Opportunities 2025

Description

The Federal Highway Administration (FHWA) Internship Program for Recent Graduates offers recent college graduates the opportunity to gain hands-on experience in the transportation industry. The program is designed to provide a professional development pathway for individuals seeking to build a successful career in public service, particularly in transportation policy, infrastructure development, and highway management. As part of this program, interns will have the chance to work alongside experienced professionals, contribute to impactful projects, and develop essential skills for a future in the transportation field.

Responsibilities

- Assist in the design, implementation, and management of transportation infrastructure projects.
- Conduct research and data analysis related to transportation policies and programs.
- Participate in the preparation of reports, presentations, and other technical documents.
- Collaborate with team members to develop strategies and solutions for ongoing transportation challenges.
- Support the evaluation of transportation systems, projects, and technologies.
- Attend team meetings, trainings, and workshops to further enhance knowledge and skills in the field.
- Provide support to various FHWA departments as needed.
- Complete assigned tasks and projects within set timelines, ensuring compliance with FHWA guidelines and regulations.

Qualifications

- Recent graduate (within the last 2 years) with a degree in Civil Engineering, Transportation Engineering, Urban Planning, Public Policy, Environmental Science, or related field.
- Must be a U.S. Citizen or National.
- Strong interest in transportation infrastructure, highway systems, and public policy.

Experience

- No prior professional work experience required; however, relevant academic projects, internships, or volunteer work in transportation, urban planning, civil engineering, or similar fields will be considered an asset.
- Experience with technical software or analytical tools related to transportation engineering or public policy is a plus.
