National Grid Summer Internship Program 2025 In United States

Description

National Grid is offering an exciting Summer Internship opportunity for 2025 in the United States. This program is designed to provide undergraduate students with a valuable hands-on experience in the energy industry, helping to develop key skills and knowledge while contributing to meaningful projects. Interns will have the opportunity to work alongside professionals, gaining insights into the operations of one of the largest utilities in the U.S. The National Grid Summer Internship Program is the perfect opportunity for individuals interested in pursuing a career in the energy sector.

Responsibilities

As a National Grid Summer Intern, you will be involved in a variety of projects and tasks that may include but are not limited to:

- Supporting teams across various business units, including Engineering, Operations, IT, Finance, Marketing, and Customer Service.
- Assisting in data analysis, research, and problem-solving activities.
- Engaging in hands-on projects that contribute to the advancement of company goals.
- Participating in meetings, presentations, and collaborative team sessions.
- Preparing reports, documentation, and presentations for leadership and stakeholders.
- Gaining exposure to key industry challenges, trends, and regulatory matters.
- Participating in professional development workshops and networking events.
- Contributing to the delivery of innovative solutions to enhance operational efficiency and customer satisfaction.
- Receiving mentorship from senior National Grid professionals.

Qualifications

- Currently enrolled in a Bachelor's degree program (undergraduate) in relevant fields such as Engineering, Business, Computer Science, Finance, Environmental Science, or other related disciplines.
- Applicants must be in their penultimate (second-to-last) year of university at the time of application.
- Demonstrated interest in the energy sector, sustainability, or infrastructure.
- Strong academic standing with a minimum GPA of 3.0 or higher.
- U.S. work authorization is required.

Experience

- No prior work experience is required, although relevant coursework, academic projects, or extracurricular involvement in energy, sustainability, or engineering-related activities is preferred.
- Previous internships, volunteer work, or leadership roles within university clubs will be an asset.
