## Navy Civilian Internship Research Graduate Program 2025

### Description

The Navy Civilian Internship Research Graduate Program 2025 is designed for recent graduates who are eager to contribute to innovative research and development within the U.S. Navy. This program provides a unique opportunity to work on cutting-edge projects related to national defense, technology, and maritime operations, while gaining hands-on experience and building valuable skills in a collaborative environment.

### Responsibilities

- Participate in and contribute to research projects that support the U.S. Navy's mission, focusing on defense technology, cybersecurity, maritime operations, and more.
- Analyze data and provide insightful recommendations based on research findings.
- Collaborate with Navy personnel, engineers, and other researchers to implement solutions to real-world challenges.
- Prepare reports, presentations, and technical documentation to communicate research outcomes.
- Support the development of prototypes, models, and simulations.
- Engage in continuous learning and professional development related to Navy operations and technological advancements.
- Participate in team meetings and contribute to brainstorming and problem-solving sessions.
- Assist in other research-related administrative tasks and responsibilities as needed.

### Qualifications

- Recent graduate or soon-to-be graduate with a Master's or Doctoral degree in a relevant field such as engineering, computer science, data science, physics, cybersecurity, mathematics, or other related disciplines.
- U.S. citizenship is required.
- Ability to obtain and maintain security clearance.
- Strong academic record with a demonstrated passion for research and development in defense technologies.

### Experience

- Previous academic or internship experience in a research or technical role is desirable.
- Exposure to defense-related projects or knowledge of military operations is an advantage.
- Experience with data analysis, modeling, simulation, or programming in languages such as Python, C++, MATLAB, or similar is a plus.

### Skills

### Hiring organization

Navy Civilian Internship
